What is 340B?

The 340B Drug Discount Program was created in 1992 by the federal government, and requires drug manufacturers to provide significant discounts for outpatient drugs to eligible healthcare organizations, also known as “covered entities.”

The program is designed to provide financial benefits to covered entities that serve low-income and uninsured patients. This enables the covered entity to expand healthcare services to better serve their communities, and to improve access to more affordable medications for their low-income and uninsured patients.

The mission of Safety-Net Hospitals is to provide quality, cost-effective care for patients and community, with respect and dignity, and without regard to ability to pay. The 340B program helps safety-net Hospitals to generate savings which they can use to support their clinical programs, and expand additional services into the community in which they are located.

SUNRx works hard to simplify, optimizing the 340B program for Safety-Net Hospitals to maximize savings and extend savings for their self-pay and underinsured patients in real-time.
Eligibility Requirements - Process

Hospital designation (DSH, CAH, SCH, RRH, Cancer, Children’s, etc.)

% DSH

Clinics

Registration to Participate in 340B

- In order to participate in the 340B Program, eligible hospitals must register with HRSA/OPA during one of the quarterly registration periods.

Contracted Pharmacies

- must also be registered once fully executed agreements are in place.
SUNRx has been managing 340B programs since 2005, and is one of the 340B technology pioneers and has been considered an industry leader.

The **complete 340B solution** includes:

- split-billing technology that provides powerful 340B savings tools that aren’t found anywhere else in the marketplace,
- contract pharmacy virtual inventory with an enhanced reporting and analytical platform which are customizable,
- a real-time, point of sale, 340B prescription discount program for the uninsured with sliding scale functionality, and
- Invoice Analysis to recover 340B pricing discrepancies.

SUNRx is an Industry leader for uninsured programs backed by the strength of MedImpact Healthcare Systems, Inc. (“MedImpact”), the largest privately held PBM, supporting our client’s mission, values, and objectives in serving their communities.
SUNRx Commitment to Compliance

- Compliance is SUNRx’s Focus for all implementations, pharmacy setup, eligibility monitoring and communications.
- Compliance driven eligibility logic to avoid duplicate discounts
- Systems are fully HIPPA and HITECH compliant
- Robust and fully compliant Medicaid process to comply with State requirements

Jacqueline E. Artinger, Esq., VP, Regulatory Affairs and Compliance stays informed of the Federal 340B Drug Pricing Program, including and not limited to the following: all regulations and requirements of the program, contract pharmacy arrangements, virtual inventory management procedures, drug replenishment using 11-digit National Drug Code (NDC) processes, and HRSA and 340B Contract Pharmacy auditing requirements. SUNRx also works with Apexus and 340B Health keeping up-to-date on all communications. Clients have access to Jackie to answer questions around 340B regulations and compliance.
Endorsements/Partners

• Exclusively endorsed by over 30 State Hospital Associations
• State Pharmacy Associations

SUNRx delivers the ONLY Complete 340B Solution and fines tunes it to ensure all the pieces are working at their best for our clients.
Split-Billing

- Affordable
- Implementation Schedule
  - Average 45-60 days, dependent on Customer IS Department/HIS vendor
  - Wholesalers typically create feeds in less than 2 weeks
- Customer service point of contact
  - In system “chat box”
- PO Optimizer
  - ID Options via GCN & GPI numbers
    - Provide intel for substitutions
  - Lower WAC Purchase volume
- Medicaid
  - ID Medicaid claims (Primary Secondary and Tertiary) with appropriate 340B scripts
    - 14-day look-back to validate and capture additional 340B eligible scripts
  - ID claims for reporting to Medicaid Bureaus to satisfy duplicate discount prohibition
- CDM:NDC mapping
  - SUNRx maps and maintains crosswalks on behalf of customers
    - Most split billing companies require CEs to create these maps
- JW modifier solutions
  - Track & keep auditable records of “Waste Charges” by:
    - Daily feed of waste, triggering waste accumulations
    - Pack size (PSTU) changes, deducting waste from accumulations
- Validator Effectiveness
  - Customizable to meet each hospital’s unique needs
  - Combinations of validators to qualify any claim (i.e. Medicaid)
Split Billing: Special Features/Functionality

**Standard Split Billing**
Split billing functionality includes Inventory Management and PO Splitting

**What makes SUNRx different?**
SUNRx adds four additional pieces for the most robust 340B Split Billing Solution; PO Optimization, PO Reconciliation, Charge Master Mapping, and Ad-Hoc Reporting
Split Billing Reports

• **Savings Reports**
  – 340B Invoice Line Item Pricing vs In-Patient Pricing Across Date Range

• **NDC Level Audit Reports**
  – Detailed History on Specific NDC across date range
  – Complete NDC 340B chronology

• **Transaction Level Audit Reports**
  – Recurring Audits – automatic, random audit report

• **Purchase Reports**
  – 340B Purchases in date range NOT in Transaction data
  – In-Patient Purchases in date range NOT in Transaction data
  – WAC Purchases in date range NOT in Transaction data
  – Transactions in date range NOT Purchases on 340B discount
  – 340B Nominal Pricing across date range

Contract Pharmacy
Contract Pharmacy

• The **Contract Pharmacy Solution** includes 100% capture of 340B eligible claims, compliance driven eligibility logic to avoid duplicate discounts, a complete virtual inventory system, robust reporting platform, pharmacy network expansion, referral prescription capture and self-audit tools.

• Eligibility interface with clients’ eHR / HIS system
Referral Capture

A claim can be in pending status if the prescription was written by a prescriber who does not exist within the Virtual Inventory, or if the entity has configured for claims to be reviewed (referral prescribers) first prior to capture. Once the claim is reviewed, the user can choose to accept or reject the claim. The top of the Claims Review Screen lists the value of the claims that need review. This tells the user exactly how much potential revenue could be generated for the Health Center if the claims can be verified, and captured as eligible 340B scripts.
Ship to/Bill to

**Contract Pharmacy Virtual Inventory**

- **Health Center**: Patients fill scripts at Contract Pharmacies. When Bottle is Dispensed, PO is Generated.
- **Wholesaler**: Purchase Order is Approved.
- **Pharmacy**: Stock is Replenished.

</table>
What is Community Benefit?

Under the Affordable Care Act, many nonprofit hospitals must meet new requirements to retain their tax-exempt status.

The ACA added Section 501(r) to the Internal Revenue Code, which contains four new requirements related to community benefits that nonprofit hospitals must meet to qualify for 501(c)(3) tax-exempt status.

• They are as follows:
  • Conducting a community health needs assessment with an accompanying implementation strategy;
  • Establishing a written financial assistance policy for medically necessary and emergency care;
  • Complying with specified limitations on hospital charges for those eligible for financial assistance; and
  • Complying with specified billing and collections requirements.

• The new ACA requirements do not include a specific minimum value of community benefits that a hospital must provide to qualify for tax-exempt status
Financial Assistance Policy

Each nonprofit hospital must develop a written financial assistance policy that contains basic information about whether the hospital offers free or discounted care; the eligibility requirements for financial assistance and a description of how to apply for the assistance; the basis for how much patients are charged for care; the collection procedures they will use; and measures the hospital will take to widely publicize the policy in the community.

The policy must apply to all emergency and medically necessary care. Hospitals may exclude some services not considered medically necessary (as defined by the hospital). In addition, there must be a separate policy that states that the hospital will provide emergency medical care to all individuals, regardless of whether they qualify for financial assistance.
Benefits of a Sliding scale / discount card Program

Deliver a true community benefit to the uninsured/indigent population in the community
• Something that provides a valuable benefit to the local community and that can be marketed as such. Publish in newsletters and publications to the community
• A marketable public relations program
• In line with the mission of the 340B program intent
• Improve customer satisfaction

Medicare Readmission Penalty benefit
• Not all Medicare Patients have Part-D prescription coverage
• The 340B cash program provides significant discounts for the patients that don’t
• Medicare patients without Part-D coverage that use the 340B cash card are more likely to fill their prescriptions
  – This potential could reduce the risk of Medicare Readmission Penalties

Charity Care Costs/Uncompensated Care
• This program allows deep discount prescription access to your uninsured/indigent population
• Providing discounted medications to your uninsured/indigent population helps assure they get their prescriptions filled
  – This reduces the risk of Charity Care cost increases throughout the Fiscal Year
Our claims adjudication system allows for multiple levels of coverage for patient populations. For example: **build a prescription plan for your uninsured patients**
