HASC Workforce Development

The Challenge
California hospitals are concerned about the need for an adequate supply of skilled health professionals to meet the demands for health care services.

The Strategy
Lead a coordinated regional effort to identify and implement sustainable solutions that ensure a sufficient supply of well-trained health care professionals at all levels of the care continuum.

HASC Workforce Development aims to:
- Identify, support and prioritize workforce needs across the region
- Conduct a regional analysis of the workforce supply and industry demands
- Identify and facilitate new partnerships between schools and hospitals
- Address urgent workforce shortages
- Engage the CHA Workforce Committee on key statewide public policy
